

Carrier rates manager

Preamble

The carrier rates Manager module allows you to easily manage rates associated with your various carriers.

3 features are also available in this module:

- Pricelist import
- Pricelist export
- Apply a pricelist from a backup

Goal

Carrier rates manager is there to speed up your updates procedures of your carriers' pricelist.

« Yes, this module looks pretty, however how will it help me to save time? »

It's very simple; there are two ways to update a carrier:

- From Prestashop's interface
 - **Pros:** Free, simple to use.
 - **Cons:** Spend a lot of time. Annoying uses.
- With a certified web agency
 - **Pros:** More or less fast according to the agency.
 - **Cons:** Expensive, and that for every change you have to do. Also you cannot use the tool yourself, or hard. Generally incomprehensible.

Module « Carrier rates manager » allows you to easily export and import pricelist in a format you know well: CSV.

- **Pros:** Cheap (module purchase price). Very fast and efficient edition. Excel is your best tool and you are in an ecosystem that is familiar. If you make a mistake you can go back to the last backup.
- **Cons:** ...

3 simple steps to speed up updates!

- Export pricelist from a carrier
- Manage complex calculation on this CSV file. **Keep this file for you next updates allows you to change variables and updates your rates instantly!**
- Import file and you have done! Your rates have been updated!
